

Kothari International School

Grade-3

STEAM Fest

Taking an integrated approach to learning science, technology, engineering, Arts and mathematics is crucial to the growth and development of students and therefore Students of Grade 3 presented their understanding of various concepts through this new model of learning during their STEAM Fest on 27th and 28th of December 2022. The students demonstrated their understanding through this new approach of learning by presenting many working models very confidently and won the appreciation of their parents and teachers for making the STEAM fest a great success!
