

KOTHARI INTERNATIONAL SCHOOL, NOIDA
ACADEMIC SESSION – 2023-2024
SUMMATIVE ASSESSMENT 2 - GRADE 4
SUBJECT – SOCIAL SCIENCE
SECTION 2

Duration: 45 Minutes

Name: _____

Class: _____ Section: _____ Date: _____

General Instructions:

1. This paper consists of 3 printed pages. (including map)
2. Read all the questions carefully.
3. All the questions are compulsory.

I. Answer the following questions.

- a) India has few mountain ranges around the country. Name any three of them.
- b) Describe the two types of rivers that are a major source of water for agriculture in our country.
Give an example of each.

II. Read the passage and answer the questions that follow.

Humans produce about two billion tonnes of garbage every year. This number grows bigger and affects everything around us. We see piles of garbage lying around in the streets smelling and rotting away. This garbage affects humans as well as animals and causes severe health damage. Oil spills in the ocean are equally dangerous killing birds, fishes and other marine animals.

- a) How can the garbage lying on the road cause damage to animals?
- b) Is it possible that the oil spills in the ocean affect humans indirectly?

III. Give reasons.

- a) Camels survive easily in deserts.
- b) Monsoon affects the agriculture in the country.

IV. List two characteristics of the following physical features:

- a) Himalayas
- b) Deccan Plateau

V. On the map of India, mark the following.

- a) Two states that grow this beverage people drink the most.
- b) Golden fibre producing two states of our country.
