SECTION A - READING

Q1. Read the passage given below carefully and answer the questions that follow.

**10
marks**

The Quiet Power of Small Actions

- 1) Most people believe that only big actions can change the world. They imagine inventors, leaders, or heroes making dramatic decisions that alter history. However, change often begins in quieter, less noticeable ways. Small actions, repeated with care and consistency, can have a powerful impact over time.
 - 2) Consider the story of Aarav, a twelve-year-old student who noticed that his school playground was often littered with plastic wrappers. Instead of complaining, he began picking up waste during his lunch break. At first, his classmates laughed at him, calling his effort pointless. Aarav continued anyway, believing that responsibility did not depend on approval.
 - 3) Gradually, others became curious. A few students joined him, then a teacher offered support, and soon the school started a recycling programme. What began as a single, silent effort grew into a collective habit. The playground became cleaner, and students developed greater awareness about the environment.
 - 4) Aarav did not plan to lead a movement. He simply acted when he saw a problem. His story reminds us that courage is not always loud, and leadership does not always seek attention. Sometimes, the smallest actions speak the loudest and inspire the greatest change.
